

How To Choose A Lasik Surgeon

Considering LASIK? Ask your surgeon these questions...

	<u>DURRIE VISION</u>	Other
<p>1. Do you use the Femtosecond laser to create the corneal flap?</p> <p>Studies prove this method is more precise and yields better results than the traditional flap-making procedures.</p>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>2. Do you perform at least 100 cases per month? How many total?</p> <p>There is no substitute for experience when trusting a surgeon with your vision. The surgeons at Durrie Vision have performed more than 50,000 procedures.</p>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>3. Are you involved with clinical trials and research for the testing of vision correction Techniques and equipment?</p> <p>Without this involvement, a surgeon cannot tell you if you are better off waiting because a better solution to your specific vision needs is on the horizon.</p>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>4. Do you invest in the very latest technology available?</p> <p>Recent advances in laser and wavefront testing technology have proven to provide better, safer results than previous technology.</p>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>5. Do you provide solutions for nearsightedness, farsightedness, astigmatism and presbyopia?</p> <p>With the right technology and skill, vision correction specialists can correct nearly any vision problem.</p>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>6. Do you perform advanced vision exams that include: dry eye analysis, wavefront vision testing, pupil size measurement, topographic corneal mapping and 3D retinal imaging?</p> <p>A thorough exam by a surgeon is critical. It will determine if you are a good candidate and which procedure or technology is best for your individual situation.</p>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>7. Are your surgeons involved from pre-op to post-op follow up care?</p> <p>It is important for the surgeon to be involved before, during and after a procedure.</p>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
